Some activities carry a risk of physical injury. No matter how careful the child and instructor are, no matter how much supervision, no matter what landing surface area exist the risk cannot be eliminated. Reduced, yes, but never eliminated. The risk of injury includes minor injuries such as scapes, bruises, and burns, and more serious injuries such as broken bones dislocation and muscle pulls. The risk also includes and always includes catastrophic injuries such as permanent paralysis or even death from landing or falls on the back, neck, or head.

I have also received, read, and understand the Flipz USA camp additional information and policy sheet.
